An Amazing Year In Amateur Radio Emergency Services!

A special "thank you" to Member At Large Steve Szombathy who generously donated so much this year including a 2 meter / 440 repeater, several mobile radios and especially his time to install our new ARES repeater. Our COMM II ARES Communications Van project began in May with a donated vehicle. After just over 300 volunteer hours and approximately \$750 (to date) in materials the interior of the vehicle is nearing completion after painting, flooring, wiring, installation of cabinets, lighting, bulletin boards, white boards, clock, antennas, fire extinguisher, first aid kit, flashlights, a generator and radios. Wow!
